

GAS PLUS

WHY USE PFS GAS PLUS?

The prolonged use of gasoline with ethanol has created some new and unique problems in our new and existing equipment. Performance Fuel Specialists is excited to announce our latest Gas Treatment Formula with Ethanol Guardian™ helping you combat all of the latest problems with your automotive and marine equipment.

It is compatible with E10 and E85 fuel. Check out what PFS can do for your equipment... Really, the corrosion pictures and the test results speak for themselves. If you are using a fuel injector cleaner or carb cleaner that is less concentrated or doesn't deliver professional testing verification, try Gas Plus today and see what your engine can do.

Enhance your engine's efficiency and protection with GAS PLUS featuring Ethanol Guardian™.

PROTECTION EVERY TIME YOU FUEL

- 12 oz bottle treats 120 gallons of gas
- 64 oz bottle treats 640 gallons of gas
- 5 gallon bucket treats 6,400 gallons of gas
- 55 gallon drum treats 70,400 gallons of gas
- 275 gallon tote treats 352,000 gallons of gas

ETHANOL ISSUES

- Ethanol corrodes metal, rubber, plastic, fiberglass and other parts of the engine, and removes fuel system lubrication
- Fuel instability, has very short shelf life
Ethanol produces about 25 to 30 percent less energy than gasoline, which means you get less performance
- Fuel economy reduction of 5-10%
- New deposit and resin formation in fuel system
Ethanol absorbs water causing the alcohol and water to separate "phase separation" causing multiple problems
Watercraft is extra susceptible.

PFS SOLUTION

- Our latest Gas Treatments with Ethanol Guardian have A Rating dual corrosion protection additives for use in ethanol fuels
- Fuel Stabilizer for long term shelf life
- Combustion improver allows you fuel to burn more cleanly and completely increasing power and performance.
- A clean fuel system gets better fuel economy and performance
- Cleans entire fuel system even ethanol deposits
- Removes the water from the system every time it is used reducing "phase separation" avoiding its problems. Using it every time keeps the water out.
